Available for **Full-Time** employment from **with Immediate Effect**

EDUCATION

National University of Singapore Bachelor of Engineering (Computer Engineering) Awarded ASEAN Undergraduate Merit Scholarship (Full coverage with allowance)	Aug 2020 – Aug 2024
Uppsala University Student Exchange Programme Courses: Cryptology, Parallel Distributed Systems, Internet of Things	Jan 2023 – Jun 2023

WORK EXPERIENCE

d.Construct Robotics <i>Assistant Software Engineer – C++, Typescript, Solid.js, WebAssembly, perSAM, Linux</i> - Spearheaded the design and implemented the front end of a graphics intensive web application - Developed and integrated back-end C++ code, and exposed functions between C++ and Typescript - Experimentation with perSAM (personalised Segment Anything Model) that segments objects from images	Jan 2024 – June 2024
NXP Semiconductors <i>Product Engineering Intern – Python, Pandas, Tensorflow, IronPython</i> - Utilized Convolutional Neural Network to classify graphs based on shape with over 90% accuracy - Experimented with Generative Adversarial Network models to create realistic synthetic data on AWS cloud - Developed GUI to export 150 gigabytes of labelled semiconductor data from TIBCO Spotfire within minutes	May 2022 – Dec 2022

ACADEMIC PROJECTS

Data Structures and Algorithm III (Uppsala) <i>Student – Python, Bash Scripting, C++, SMT-Lib, MIP, SAT Solvers</i> - Constructed an MIP model that sieves 2×10^{17} possibilities to arrive at optimal answer within 5 minutes - Scripted Python parsers for SAT encodings to solve over 30000 cases in under 5 minutes - Implemented Stochastic Local Search for Investment Basket problem to get (sub)optimal solutions fast	Jan 2023 – Mar 2023
Vigenère Cipher (Uppsala) <i>Student – Python</i> - Visualised frequency charts of 29 Swedish text and characters to encryptions with Python - Formulated a mathematical way to guess with more than 95% accuracy of keys from other teams	Jan 2023 – Feb 2023
CG4002 Capstone Laser Tag <i>Machine Learning Component – Python, Pandas, Scipy, Tensorflow, Xilinx, C++</i> - Coordinated a team of 5 students to create a 2-Player Augmented Reality laser tag - Deployed a Convolutional Neural Network using TensorFlow accomplishing above 95% validation - Achieved 99% expected result match during accelerator integration using Xilinx and C++ - Undertook responsibility of Game Engine and server communications to successfully predict 39/40 actions	Aug 2022 – Nov 2022

CO-CURRICULA EXPERIENCE

Residential College 4 House Committee <i>Executive Committee – Head of House</i> - Directed a committee of 25 people to plan and execute events and welfare for over 100 residents - Partnered with the College Students' Committee to assist in college-wide events of over 400 participants - Attained 94.2% approval ratings among 120 voters during elections	May 2021 – May 2022
National University of Singapore Student Union Student Life Fair <i>Executive – Marketing Executive</i> - Negotiated with at least 15 companies on sponsorship matters - Secured over \$150,000 worth of products for give-away goodie bags - Facilitated virtual event with a strong outreach totalling 7,596 visitors	Jan 2021 – Oct 2021

ADDITIONAL INFORMATION

- | | |
|---------------------------|---|
| • <i>Roles Interested</i> | : Distributed Systems, Software Development, Parallel Computing, Networking |
| • <i>Technologies</i> | : Python, C, C++, Java, SQL, JavaScript, React.js, SolidJS, Verilog |
